**“Students were able to see themselves as a larger part of the whole picture and to better comprehend that positive change happens across many different types of projects, with many different types of people doing small things”**

-Kimberly Williams, Smithtown High School

## 2,164 STUDENTS IMPACTED

24 teachers supporting projects

## 8 PRESENTATIONS

Including EPA LISS COE, NMEA, Ocean Sciences, and SENEME

## 27 PROJECT PARTNERS

**“It was a joy to watch the students engaged in hands-on learning about the Long Island Sound. Seeing the students and hearing their reactions during the oyster dissection and the field trip to the Marine Education Center was amazing. Letting children "get their hands dirty" and have this first hand experience really allows them to make meaningful connections.”**

-Terri Agravat, Trinity Elementary School
