

Long Island Sound Blue Schools 2024- 2025

Schools across Connecticut and New York work to sustain a healthy watershed with funding from the EPA Long Island Sound Partnership. Managed by Connecticut Sea Grant and Mercy University, schools make a commitment to carry out community-wide action projects that educate the public and bring awareness to the importance of our local watersheds and one global ocean.

Long Island Sound Schools

House of Arts Letters and Science Academy
The Sound School
Thomaston High School
Water Fitzgerald Campus
Susan E. Wagner High School
Urban Institute of Mathematics
Urban Assembly Institute of Math and Science for Young Women

The Bronx Lab School for Historical Discovery

**1,801 students & 58
teachers impacted**

17 Presentations
Including NYSMEA, NMEA,
and SENEME

**76 Community
Project Partners**

"This project has allowed our students to extend their learning and curiosity beyond the classroom. Students have developed new knowledge by thinking about real-life issues that affect the healthiness of the ocean animals and all other living organisms. Students have developed an interest in becoming advocates and most importantly, being proactive towards a better sustainable world in the future."

—Carmelia Rodriguez,
The Bronx Lab School for Historical Discovery
